PRODUCT

FRESH PACK KIT

DESCRIPTION

ECO FRIENDLY

CushionPaper Thermal is the ideal solution, made from 100% recyclable paper, for protecting and transporting any product sensitive to temperature fluctuations. CushionPaper's extra high flutes create air chambers that, combined with the special heat-reflecting paper, help maintain the internal temperature for a longer time. The shock-absorbing capabilities of CushionPaper and the fact that it can be disposed of in regular paper recycling programs, render CushionPaper Thermal a complete and reliable solution.

Benefits:

Provides insulating properties and:

- can be easily reused several times;
- can be recycled in any municipal recycling stream (PAP20);
- Reduces food waste;
- Increases the distances that products can be shipped;
- Reduces the formation of condensation inside the box.

Extraordinary shock-absorbing properties to:

- better handle fragile products;
- maximizing the internal volume of the box;
- reduce the need for internal components.

APPLICATION

Food; Suitable for fresh shipping;

TECHNICAL DATA

FEATURE		U/M	VALUE	
Type of thermal insulation		-	Air chamber + reflective AL	
Material		-	Kraft paper	
Recyclable yes/no		-	Yes, 100%	
Outer dimension	box 1	mm	internal size	280 x 280 x 260
	box 2	mm		380 x 380 x 160
	box 3	mm		210 x 210 x 290
Inner dimension	for box 1	mm	internal size	260 x 1045
	for box 2	mm		160 x 1445
	for box 3	mm		290 x 800
Temperature tests		-	Compliant with ISTA 7E specifications	
Certification		-	FSC	
Customization		-	1 colour	
Box type		-	Fefco 201	

Compliant with ISTA 7E specifications

- External temperature
- Temperature inside the box
